†Depending on how your CallXpress system is set up, these commands may not be available. Please consult your system administrator for additional information.
Welcome!
Your organization’s new CallXpress® unified messaging system is designed to provide you with the same convenient access to your voice, fax, and email messages whether you are at your desk or calling in over the telephone. When you call in, our Octel Aria emulation saves you the effort of relearning most of the keystroke commands you use to send, retrieve, and manage messages.

Before You Start
To set up CallXpress, your system administrator will give you the following information.

CallXpress internal number:

CallXpress external number:

Your subscriber mailbox number:

Your system administrator may also give you a default security code to use when you log on to CallXpress for the first time.

Gaining Access to Your Mailbox
Follow these simple steps to start using CallXpress.

1. Call the CallXpress internal or external number.
2. If necessary, press # or any other key that your CallXpress system requires.
3. If prompted, enter your subscriber mailbox number.
4. Enter a security code (or the default code, if your administrator has given you one).

Performing Common Tasks
If you’re looking for a quick hint on how to perform a specific task, read on.

Getting Started
